EXPERIENCE

Freelancer
Aug 2022 - Present

Mediterraned Website
NextJS, TailwindCSS, Wordpress, Hostinger, Vercel, Figma, GraphQL
Developed a dynamic and responsive website for Mediterraned, implementing Figma mockups, utilizing modern front-end frameworks and ensuring seamless integration with WordPress. Deployed on Hostinger and Vercel.

Databases Platforms - Mocamfe and Queima das Fitas
Remix, Prisma, TailwindCSS, PostgreSQL, Python, Flask, React
Developed database-driven platforms for various clients, including managing member activities, payments, and credentials. These projects automated workflows, enhanced user experience, and integrated real-time functionalities, ensuring efficiency and reliability

Other Websites
React, NextJS, Astro, TailwindCSS, Vercel, Netlify, Figma
Developed static websites focused on displaying information. Focused on clean design, responsive layouts, and fast load times, hosting on Netlify and Vercel.

Software Engineer
Accenture
Jun 2020 - Jul 2022 (2 years, remote)

Valvoline (VIOC)
Angular, Jest, Java, Spring Boot, SQL
Developed an Angular-based platform for VIOC back offices and garages as part of an Agile project with multiple streams.

Load Testing Projects
Python, JMeter
Conducted load testing and performance assessments for critical platforms, including the German government's Covid-19 vaccination registration platform. Developed Python scripts to analyze performance data.

EDUCATION

Bachelor in Computer Science
University of Coimbra
2016 - 2019, Portugal

Business Information Technology
International Studies Program @ University of Twente
Semester 2019 - 2020, Netherlands

I'm a Fullstack Engineer with a Bachelor's in Computer Science. I began my freelance journey because I wanted to challenge myself and learn other languages/approaches. Now that I have expanded my portfolio I'm looking for an organization where I can use these skills. I'm seeking a dynamic, value-driven organization with a youthful spirit.

Tools & Technologies
